PROFESSIONAL SUMMARY

I am a third-year BSIT student and versatile Developer who loves coding, building clean interfaces, and is highly passionate about back-end logic and database systems. I possess a strong foundation in modern web frameworks (React, TypeScript, Node.js) and practical experience in mobile application development (Android). Experienced in writing clean code, designing secure REST APIs, and implementing end-to-end automated testing (Cypress). Seeking to leverage my technical flexibility and strong problem-solving mindset to contribute to impactful software projects at JLABs Innovatech Inc.

EDUCATION

Quezon City University | Quezon City, Philippines
Bachelor of Science in Information Technology (BSIT) | Expected Graduation: 2027
- *System Architecture, Database Management, Software Engineering, Web Development.*

TECHNICAL PROJECTS

Clarity (Personal Cloud Project) | Full Stack Developer | Mar 2026 – Present

- *Live Project:* [clarity-journal-psi.vercel.app](#)
- Designed and built a responsive, modern web application utilizing React, TypeScript, and CSS, deploying it on Vercel's serverless environment.
- Integrated Google Cloud Platform (GCP) Vertex AI model endpoints to power secure, intelligent user journaling features.
- Authored end-to-end (E2E) automation and unit tests using Cypress to maintain robust code quality and bug-free user journeys.

Pharmacy Management System Migration | Full Stack Developer | Jan 2026 – May 2026

- Migrated a legacy system to a modern web-tech-stack desktop application using Electron, Node.js, and MongoDB.
- Developed asynchronous data pipelines to parse, secure, and update transactional JSON data flows seamlessly in the database.
- Actively participated in peer code reviews, debugging, and User Acceptance Testing (UAT) to resolve software performance errors.

Guard-Side Monitoring & QR Notification System | Project Manager & System Analyst | Aug 2025 – Dec 2025

- Engaged directly with academy stakeholders to obtain system requirements, ensuring the completeness and accuracy of technical documentation.
- Delivered regular project status updates to clients and peer developers, maintaining strong stakeholder relations throughout the software development lifecycle.
- Mapped business processes to system capabilities and defined logical rules based on strict client requirements for real-time notification endpoints.

LEADERSHIP & INVOLVEMENT

DataCamp X Data Engineering Pilipinas Scholar (Apr 2026 – Present):

- Advancing database scripting and scalable systems design through structured modules.

Active Tech Event Enthusiast

- Regularly attend industry conferences and community meetups (including GDG Manila DevFest) to stay at the forefront of modern cloud orchestration, secure API integrations, and robust deployment pipelines.

TECHNICAL SKILLS

- **Backend & Databases:** C#, ASP.NET MVC, Microsoft SQL Server, Node.js, MongoDB, REST/JSON APIs
- **Cloud & Architecture:** Google Cloud Platform (GCP), System Design, Asynchronous Data Pipelines
- **Frontend:** React.js, JavaScript, HTML, CSS, Electron
- **Tools & Practices:** Git/Version Control, Postman, CI/CD concepts, Arch Linux (Custom environment configuration)
